Proprietary	<90
	17557-23-2

^{*} Exact percentage is a trade secret. Concentration range is provided to assist users in providing appropriate protections.

4. FIRST AID MEASURES

Inhalation: Move to fresh air.

Skin contact: Wash contact area with soap and water. Remove contaminated clothing.

Launder contaminated clothing before use.

Eye contact: Immediately flush thoroughly with water and get medical attention.

Ingestion: Seek immediate medical attention. Do not induce vomiting.

Irritating to mouth, throat and stomach.

Symptoms: See Section 11.

Notes to physician: If ingested, material may be aspirated into the lungs and cause chemical

pneumonitis. Treat appropriately. Application of corticosteroid cream has

been effective in treating skin irritation.

5. FIRE FIGHTING MEASURES

Extinguishing media: Water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Special firefighting procedures: In enclosed spaces, wear a self-contained breathing apparatus. Prevent

runoff from entering streams, sewers or drinking water supply.

Unusual fire or explosion hazards: None

Hazardous combustion products: May generate ammonia and nitrogen oxide gases. Halogenated compounds.

6. ACCIDENTAL RELEASE MEASURES

Use personal protection recommended in Section 8, isolate the hazard area and deny entry to unnecessary and unprotected

Environmental precautions: Ventilate area. Do not allow product to enter sewer or waterways.

Clean-up methods: Absorb or cover with dry earth, sand or other absorbent, non-combustible

material. Dispose of via a licensed waste disposal contractor. Refer to Section 8 "Exposure Controls / Personal Protection" prior to clean up.

7. HANDLING AND STORAGE

Handling: Prevent contact with eyes and avoid contact with skin Avoid breathing vapor

and mist. Wash thoroughly with soap and water after handling. Persons with a

history of skin sensitization problems should not use.

Storage: For safe storage, store between 2°C (36°F) and 40°C (104°F).

Keep in a well ventilated, dry area. Keep container tightly closed until ready

for use.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Employers should complete an assessment of all workplaces to determine the need for, and selection of, proper exposure controls and protective equipment for each task performed.

Engineering controls: Use positive down-draft exhaust ventilation if general ventilation is

insufficient to maintain vapor concentration below established exposure

limits.

Respiratory protection: Not required for properly ventilated areas.

Eye/face protection: Safety goggles or safety glasses with side shields. Full face protection

should be used if the potential for splashing or spraying of product exists.

Skin protection: Use chemical-resistant, impervious gloves as necessary to prevent contact.
